Front End Engineer with more than 2 years of working experience maintaining production and early stage web applications. Analytical, reliable, and an enthusiastic team-player with a conscientious work ethic.

## WORK EXPERIENCE

[OpenMentorship](#) - Matching app for engineers 

05/2020 - Present

### Lead Front End Software Engineer

- Developed a mentor-mentee matching application for engineers with a projected reach of 100,000 initial users using **React**, **SASS/Material-UI**, **JavaScript**, and **Axios**

[GitPay.me](#) - Bounty website for developers 

04/2020 - Present

### Front End Software Engineer

- Reduced user flow issues through the improvement of UX/UI which increased CTR by 50% through the creation of a landing page using **React**, **JavaScript** and **Bootstrap/CSS**
- Provided on-demand developer support to create new or better solutions for bug fixes, design patterns and implementations resulting in more streamlined development/hotfixes

[PlaceSpeak](#) - Geolocation based constituent consulting

06/2019 - 01/2020

### Lead Front End Software Engineer

- Overhauled all user interfaces which increased site traffic by more than 60% using **React**, **Redux**, **Bootstrap/CSS**, **JavaScript**, and **JQuery**
- Resolved bugs pertaining to **asynchronous** requests, **data pipeline**/flow, **React/Redux state management** and **CSS** issues resulting in 70% reduction of technical debt, improved usability and 50% increase in load times.

## PROJECTS

[Shower Thoughts](#) - Share your shower thoughts with friends 

- Twitter-clone where users can **CRUD** data, comment and rate each other
- Created with **React/Redux**, **Material-UI**, **Firebase**, **Express**, **Node.js** – features **RESTful** consumption, user login with authentication, image uploads, cloud functions, notifications, deployment to Firebase
- Leveraged the concept of loose coupling for high cohesion using React and Redux to allow for the least amount of component reliance and most defined task contribution

[Expense Tracker](#) - Track your spending habits 

- Expense tracker where a user can **CRUD** data, search through them by date, and sort by amount or date
- Created with **React/Redux**, **Firebase**, tested with **JEST** and **Enzyme**, **SCSS**, built with **Webpack** and **Babel** for optimization and cross browser support, and deployed on **Heroku**

## EDUCATION

▪ **Thompson River University**  
Computer Science

▪ **Simon Fraser University**  
Mathematics – Certificate of Computer Science
